

## IFOPA Outreach Letter from Mirum CEO Chris Peetz

Dear FOP Community,

I am truly excited to introduce Mirum Pharmaceuticals, Inc. (Mirum) as an additional partner to Incyte in the continued development of the investigational therapy, zilurgisertib. Along with the FOP community, we share a goal of bringing new treatment options to people living with FOP as quickly as possible.

For those of you who are unfamiliar with Mirum, we are a multi-product, commercial-stage rare disease company with years of experience supporting people living with rare and ultra-rare diseases. We are relentlessly focused on conditions where the burden is profound and the unmet need remains high. Mirum recently entered into an agreement with Incyte for the worldwide commercialization rights to zilurgisertib. Incyte will continue to lead development of zilurgisertib, including the ongoing PROGRESS study, and there are no planned changes to the conduct of the study.

We would like to recognize the incredible dedication and work to date of individuals living with FOP, their families, researchers, clinicians, advocates, and industry. Together, these efforts have helped advance progress toward improving the lives of those affected by this devastating condition.

As part of our shared commitment to advancing treatment options and supporting patients, a New Drug Application for zilurgisertib has been accepted by the FDA and granted Priority Review with an action date of September 26, 2026, and Incyte and Mirum are also pleased to offer access for new patients 12 years of age or older in the United States through a Compassionate Use program. For more information, please contact your physician.

We are honored to be part of the global FOP community and look forward to working together with urgency and purpose to make a meaningful difference for people living with FOP and their families.

Sincerely,

Chris Peetz  
Chief Executive Officer  
Mirum Pharmaceuticals, Inc.
